

Policy Central Enterprise

HOW MUCH IS CYBERSLACKING COSTING YOUR BUSINESS?

- Is your business at risk from misuse of your IT systems and network?
- How much time are your staff spending on personal activities on the internet?
- Are you giving your staff the equivalent of two extra weeks leave a year through cyberslacking?
- Are you concerned about your company's legal liability regarding inappropriate use of the internet?
- Do you have an Acceptable Use Policy?

Protect your staff and your company with Policy Central Enterprise

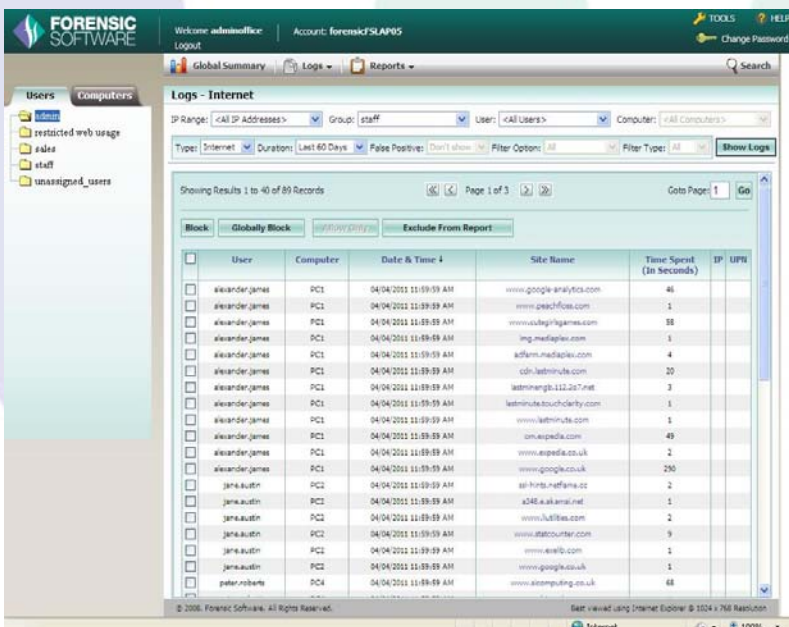

When companies provide staff with personal computers they know they are equipping them with a tool that can potentially be misused. Whilst occasional time spent on personal email, online shopping or holiday-booking is reasonable, how are you controlling the inappropriate and over use of the network for non company related activities, including cyber bullying, cyber slacking and other forms of unacceptable behaviour.

Customer testimonial

"We purchased Policy Central because we were concerned that the internet was being abused and that this was becoming a huge cost to our business in terms of time spent/man hours. We hadn't quite realised the extent or level of abuse and understood very quickly that employees were spending hours on non company business on the internet every day, even doing their grocery shopping etc. Your software has 'paid for itself' by the amount of time lost in man hours per day prior to installing it. This is why I mentioned the AUP first, as it makes it very clear that the internet is for company use and reminds us all that the company do not employ us to send personal mail/ facebook/ shop and browse on the internet for half the day! The cost of installing a new server and buying your software I believe paid for itself within one month!"

Put a stop to inappropriate and harmful activities with Policy Central Enterprise. These include:

- **Cyber slacking, wasting time on personal activities**
- **Bullying, sexual harassment and discrimination**
- **Circulation of potentially abusive or offensive material**
- **Access to inappropriate web sites**
- **Downloading illegal material**
- **Accidental or deliberate disclosure of sensitive commercial information**
- **Commercial sabotage or malpractice**
